

Who is WHO?

DID YOU KNOW THAT ...

- ... the World Health Organization (**WHO**) will intervene directly in your life in the event of a Public Health Emergency of International Concern (PHEIC) in the future and thus supersede our rule of law?
- ... in the future, the current head of the **WHO** (Tedros Adhanom Ghebreyesus) will be able to dictate to you what health measures are to be taken for the greater good, impose travel and living restrictions on the global population based on which government sanctioned pharmaceutical products you have submitted to and paid for?
- ... your civil rights as an individual will no longer exist, and you will find no official agency to defend them, either at the state or federal level? The **WHO** will have ultimate legal say over any and all claims against its decisions and protocols.
- ... by law, a new historic Global Pandemic Treaty requires our government must meet the requirements of the **WHO** (lockdown, vaccinations, etc.) in the future?
- ... our politicians will not have an active say in who will impose whatever instructions and protocols will be required?
- ... this new treaty provides the **WHO** with the exclusive power to choose, decide, or select which products we use? Competing products from other manufacturers and nations will not be considered?
- ... neither we citizens nor our democratically elected governments can elect the Director-General of the **WHO** or influence their projects or goals?
- ... our elected political representatives will most likely approve without question the final regulations, since they are already not negotiating in the interests of the citizens?
- ... your freedom to travel in the future will depend on the current requirements of the **WHO**, as it will determine whether and where citizens are allowed to travel?
- ... the **WHO** will prescribe what you are allowed to learn and discuss with others, since the constitutionally enshrined freedom of the press and freedom of expression is to be suspended?

INTERNATIONAL – MULTILINGUAL
